SPARSAMKEIT

DICHTHEIT

STABILITÄT

Eine bessere Isolierung dank der modernen Zusammensetzung der bis zu 60 mm dicken Scheiben. Profile der A Klasse, zeichnen sich dank der Breite von 92 mm durch eine gute thermische Isolierung und hohe energetische Effektivität aus.

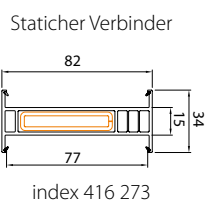

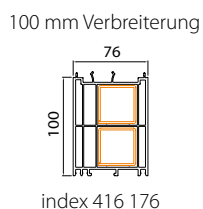

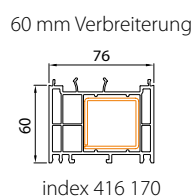

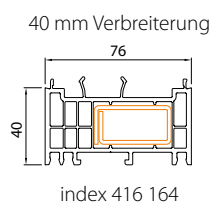

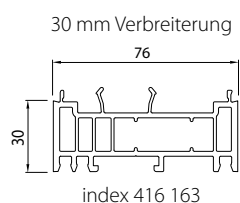

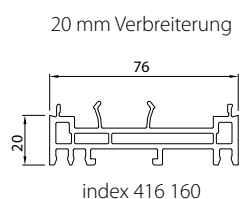

Dreifaches Dichtungssystem, zwei umlaufende Dichtungen und eine Mitteldichtung.

Eine sichere Lastübertragung der dicken Scheibensätze dank speziell entworfenen Kammern und großen Verstärkungen.
