MODULAR
LIGHTING INSTRUMENTS

MODULAR understands the importance attached by consumers to lighting, design and technology. By consistently coming up with and creating clever, amazing and energy-friendly lighting solutions, we are constantly pushing the boundaries of architectural lighting. We continue to set the trend with our thoroughly well-thought-out handling of bold design. By making use of cutting-edge LED technologies and anticipating future energy trends, we remain faithful to our global role of pioneers in the industry, always keeping one step ahead. Rather than standing out, we achieve this with a discreet presence. This means the right solution, appropriate intensity and the desired result.

PROFILES – A SOLUTION FOR EVERY NEED

Working with profiles within your lighting plan engages you to be creative. The right profile with the right lighting unit guarantees a perfect blend with the environment and generates a leverage of the architecture. Profiles are the ultimate functional lighting tool, with superior efficiency & light output results. They can be used as orientation, accent or general lighting and this in a residential, commercial, healthcare or office setting.

The vast range of Modular profile families with an according range of lighting units and accessories offers you the solution for every demanding environment. It includes **ready-made** as well as **made-to-measure** solutions and comes with high-efficient LED, fluorescent and halogen lighting units. The ready-made profiles come in fixed lengths and with fixed lighting units while the made-to-measure formula gives you unlimited flexibility. From continuous lines of light to square configurations and everything in between.
