

SOLAR PV OPERATION & MAINTENANCE

RENEWABLE ENERGY & ENERGY EFFICIENCY ENGINEERS

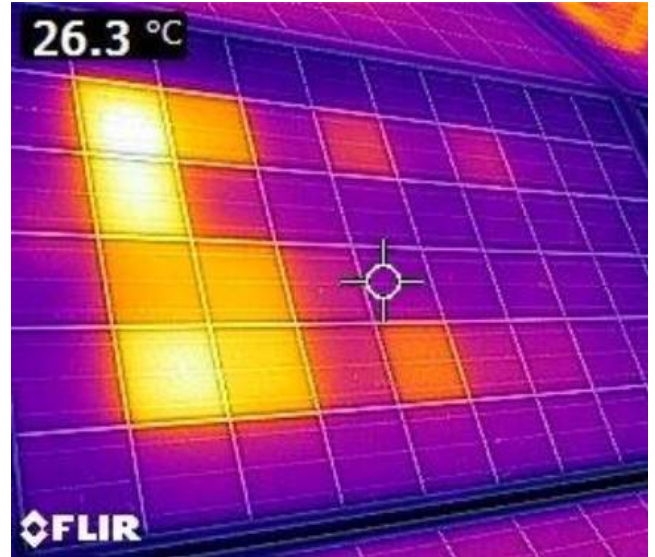

LHW Partnership LLP | The Annex, PO Box 6430, Leighton Buzzard, LU7 6FE | 020 3290 5497 | www.lhwp.co.uk | enquiries@lhwpartnership.co.uk

O&M SERVICES

MAINTAIN YOUR SYSTEM TO OPTIMISE GENERATION

We offer a range of O&M services for the rooftop solar PV market. We have been involved with solar PV systems since 1999 and we hold experience with module optimisers, micro-inverters, string inverters and central inverters based systems.

We work for a range of customers in several markets including domestic, commercial, Local Authority and large scale and HV solar farm developers.

AERIAL INSPECTIONS

UTILISE TOP OF THE RANGE EQUIPMENT FOR SERVICING

LHW Partnership owns leading analysis equipment including an I-V string curve tester, infrared thermography equipment and software and combined with years of experience we can ensure that a solar PV system is operating optimally.

LHW Partnership is one of only a few organisations in the UK to hold congested area approval from the Civil Aviation Authority for operating Unmanned Aerial Vehicles (UAV or 'drones') with a 20m area of control.

Contact us to discuss a tailor made O&M package.

SERVICES

O&M PACKAGE INCLUDES:

- + Annual Health Check / Yield Review
 - Periodic yield appraisals
 - FIT data submissions
- + Routine Preventative Maintenance
 - Electrical equipment inspection
 - DC & AC testing
 - Performance optimisation
 - Visual & IR aerial inspection
 - System cleaning
- + Reactive Maintenance
 - Investigate and resolve problems and failures
