YIELDWORKS

A modelling solution for maximising solar PV array size in areas of grid connection constraints

Up to 10 kWp	Estimated Seasonal Demand	£ 200
10 to 30 kWp	Estimated Seasonal Demand	£ 300
30 to 100 kWp	Half-hourly Demand Data & Uncomplicated Array Layout	£ 350
100 to 250 kWp	Half-hourly Demand Data & Uncomplicated Array Layout	£ 400
250 to 1 MWp	Half-hourly Demand Data & Uncomplicated Array Layout	£ 500
Greater than 1MWp	Uncomplicated Array Layout	P.O.A
Optional Extras	3D PV Simulations Optimiser Modelled Solution Shading Objects Behind the Meter Battery Storage Purchased Irradiation Datasets Bi / Tri-facial	P.O.A
