Front and rear etha foams, adds extra buoyancy and strength to the deck.

Soft Thigh Grips

Padded thigh grips for comfort and control while edging and turning.

Padded Back Band

Added support and comfort.

MODEL

VAPOUR

BEST FOR

Fast turns and paddling speed

The Vapour has the benefits of both manoeuvrability and straight line speed. Integrated bumpers reduce volume and drag. Reduced volume in both ends results in fast turning and the fast straight line speed is achieved by the reduced rocker.

MODEL

NITRO

BEST FOR

Fast acceleration and turns

Finely tuned, high performance kayak built for the player who thrives on acceleration and manoeuvrability. Reduced volume in the tail allows the kayak to dip for fast turns but doesn't reduce sprint speed

MODEL

INTERNATIONAL

BEST FOR

Fast top speed

Fast straight line speed make this an ideal choice for those who like to play fast and get to the ball first. Make every paddle stroke count and win those fast sprints.

MODEL

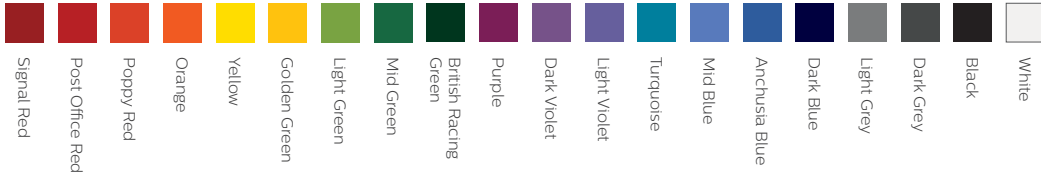

REVENGE PE

BEST FOR

Manoeuvrability and stability

The Revenge PE is a high performance polyethylene polo kayak designed using the extremely successful composite versions as a blueprint. Made from the same materials as Pyranha WW models for a hard wearing and durable kayak, ideal for clubs and those individuals just starting out.
