

PRODUCT LIST

MANUFACTURES OF INDUSTRIAL CLEANING AND MAINTENANCE PRODUCTS

ACIDS & SOLVENTS

C302 - ALUMINIUM CLEANER & BRIGHTENER

A blend of acids and powerful surface agents which have been specifically designed for cleaning and polishing aluminium fabrications which tend to become dull, corroded and pitted in service. Correctly used this product will not affect paintwork and it contains no abrasives.

C303 – COMBINED DESCALER/DEGREASER

A carefully selected combination of surfactants, inhibitors, water soluble solvents and inorganic acid, designed to provide a product which rapidly penetrates oil and grease, loosens dirt and soil allowing easy rinsing with water. After treatment concrete surfaces are left clean and bright with an "as new" appearance. Metal surfaces are left etched to provide a keyed surface for paints and other surface coatings.

C304 – HIGH STRENGTH CHEMICAL DESCALER

An acid based rust and scale remover specially formulated for the construction trade, to remove concrete from all plant equipment and brickwork.

C305 – CEMENT AND CONCRETE REMOVER

A powerful acidic cleaner and descaler containing special additives to boost the action and penetration of the solution. It is designed to minimise attack on bare metal and modified to prevent fuming which is associated with acidic solutions.

SP0407 – EXTRA STONG BRICK AND CONCRETE CLEANER

A concentrated, non-flammable acidic formulation which has been designed for removing scale, mineral and lime deposits and cement stains from masonry surfaces. Special additives speed the action of the chemicals which is inhibited to minimise attack of metals.

E501 – SOLVENT DEGREASER

A non-toxic liquid chemical degreaser which is non-caustic, fast acting and does not give off offensive odours. It emulsifies grease and oils into a milky emulsion.

E502 – SOLVENT DEGREASER CONCENTRATE

A blend of powerful degreasing solvents and emulsifiers designed for use as a dilutable concentrate in heavy duty degreasing applications. It does not contain either acids or alkalis and may also be used to prepare emulsion concentrates for steam cleaning applications.

E503 – TAR, BITUMEN & GLUE REMOVER

A blend of powerful solvents and emulsifiers designed for the rapid and effective removal of tar, bitumen and glue from a variety of surfaces. It is also a very powerful degreaser and may be used for heavy duty degreasing application.

BLEACH, DISINFECTANT AND DEODOURISERS

J901 – BLEACH DISINFECTANT CONCENTRATE (15%)

A powerful bleach disinfectant concentrate based on sodium hypochlorite which is widely recognised as a most effective product for sanitising applications.

J903 – PINE DISINFECTANT

This is a combination of phenolic derivatives, surface active materials and chelating agents presented in the foam of a mobile liquid with a fresh and pleasant aroma. It is designed for use as a general purpose pine disinfectant.

J904 – LEMON DISINFECTANT

This is a pleasantly perfumed disinfectant based on quaternary bactericides which allow a much more pleasant smell without the typical background odour of phenolic disinfectants.

J907 – POWER BLEACH (5%)

A bleach which is a blend of non-harmful bacteria, enzymes and essential nutrient salts. Regular use of this bleach will effectively attack carbohydrates, fats and proteins and so prevent clogging of sewage systems and waste pipes and minimises offensive odours.

J908 – LEMON DEODOURISER

A concentrated product based on pleasant, powerful, deodorisers and citrus perfumes designed to overcome malodours in the widest range of environments.

SP9536 – ODOURMASK

This product is fully biodegradable blend of essential oils and perfumes emulsified for use at high dilutions where unpleasant odours are a problem. It provides a strong, lingering, pleasant alternative to bad smells. Especially effective for public toilets and schools where stale urine creates a problem. Used on public transport it will overcome sickness smell. It can also be effective for drains, waste disposal units, wheelie bins etc. and can be used in breweries, hospitals and on sewage farms.

GENERAL AUTOMOTIVE CLEANER

SP0737 – VINYL SHEEN

This is a silicone based premium product for giving a deep shine to vinyl, plastic, leather and rubber surfaces. Highlights black rubber and vinyl, enhances other deep colours. The non-sticky formulation actually repels dust and dirt protecting all surfaces.

D406 – WINDOW & GLASS CLEANER

A combination of solvents, surface active agents and polishes which have been designed as a convenient and effective cleaner for windows and glass surfaces. The special polishes present in the product impart an outstanding sparkle to glass, resist re-soil and misting in humid conditions.

D408 – FAST EVAPORATION GLASS CLEANER

A unique blend of solvents and surface active agents which together form an extremely effective glass cleaner, it will remove stains and insect debris without smearing and leave the surface with an outstanding sparkle.

SPL047 – TYRE DRESSING

This product is a special formulation for restoring the appearance of the tyre and rubber surfaces. It is quick drying and spirit based for longer lasting effect.

D403 – LOW FOAM CARPET/UPHOLSTERY CLEANER

A low foam detergent carpet and upholstery cleaner suitable for use on both natural and man-made fibres, cleans all types of carpets without leaving residues.

SP0961 – DEICING SOLVENT

A combination of solvents, surface active agents and anti-icing additives designed as a versatile solution for the rapid clearing and removal of frost and ice from a wide range of surfaces. Special additives remain on the surface after treatment to inhibit further re-icing.

SP0931 – WINDSCREEN WASH ADDITIVE

This product is a blend of detergents and solvents with anti-freezing properties. It easily removes insects and traffic film from windscreens.

C303 – ALLOY WHEEL CLEANER

A blend of phosphoric acid and powerful surface active ingredients that penetrate and dissolve oil, oxides, road film, accumulated brake dust and diesel smoke stains from aluminium road wheels.

HAND CLEANERS

D416 – LIQUID HAND CLEANER CONCENTRATE (MEDICATED)

A high quality medicated skin cleanser which combines powerful yet gentle cleaning agents. It has been designed for use not only as an excellent hand cleaner but also as an all over body wash. It is totally free from organic solvents and is effective in both hard and soft water and can be diluted with up to seven parts water.

D440 – CITRUS BEADED HAND CLEANER

This hand cleaner has been cream formulation containing no solvents and yet is very effective for removing grease and grime from hands. The non-solvent formula avoids excessive defatting and the neutral pH is kind to the skin. The product also has a very pleasant natural citrus fragrance and is suitable for use in engineering, automotive and public service industries.

SP9266 – PINK PEARLISED HAND SOAP

This pink pearlised hand soap is a luxury lotion for hands and body washing. It is ideal for use in washrooms or bathrooms, for hotel, airports, offices and sports and leisure centres. It has excellent skin care properties, lathers well and cleans gently but effectively leaving a pleasant fragrance. Ideal for use in hand dispensers.

SP9102 – HAND CLEANSER/SANITISER

Removes oil, grease, inks and grime from hands yet leaves the skin supple and clean. Does not contain any solvents, paraffin's, abrasives or other irritants. The added bactericide reduces the risk of dermatitis. Ideal for washroom soap dispensers. For light duty hand cleaning can be diluted with up to 5 parts water.

D420 – BARRIER CREAM

This special formulation gives protection from paints, inks, grease, dirt and grime. The added lanolin derivatives help condition the skin, prevents sores and chapping in cold weather.

SP9134 – BACTERICIDAL HAND RINSE

An alcohol based bactericidal hand rinse designed for use in the food industry where a high standard of personal hygiene is demanded. Leaves hands free of microbial organisms making it an ideal product for use in high risk areas such as cooked meat plants and other food preparation areas.

HARD SURFACE CLEANERS

A102 – HARD SURFACE CLEANER CONCENTRATE

This is a product which is a mildly alkaline built, anti-bacterial, multi-purpose cleaner concentrate with outstanding chelating and soil suspending properties. It is safe for use on almost all surfaces and being anti-bacterial, makes it ideal for use on kitchen surfaces or wherever bacteria may be a cause for concern.

A122 - HARD SURFACE CLEANER CONCENTRATE

This is the same formulated product as A102 but with the addition of a pleasant alpine fragrance, therefore not for use on food preparation surfaces.

A114 - HARD SURFACE CLEANER CONCENTRATE

This hard surface cleaner has an alkaline detergent composition which contains solvents to enhance its grease removal properties. It contains phosphates and alkali builders which together have been specially selected to optimise its soil suspension ability.

A120 – FOAMING CLEANER

A high foaming cleaner which is an aqueous blend of alkali silicates, phosphates and chelating agents, non-ionic and cationic detergents. It is a non-toxic, biodegradable, safety cleaner designed for use with cold water pressure washer fitted with a foaming nozzle, and it is suitable for a wide range of applications.

B201 - HARD SURFACE CLEANER CONCENTRATE

This product is a highly alkaline detergent composition containing solvents to enhance its grease removal properties. It is very similar in composition to A114 but is much more alkaline therefore making it ideal for the more heavy duty applications.

D434 – LUXURY GENERAL PURPOSE DETERGENT & WASHING UP LIQUID

A product which is a combination of biodegradable surfactants, cleaner, foam boosters and soil suspending agents designed for use as a general purpose detergent. It is equally suitable for both in hard and soft waters and has been formulated to minimise the problem of detergent residue in drains. D434 is formulated as a luxury product, being kind to the skin, giving an attractive controlled lather and being pleasantly perfumed.

SP0901 – ORANGE CLEANER

This product has been developed primarily as a kitchen degreaser. It is a natural blend of biodegradable solvent based on citrus oil extracted from orange peel, and as such makes an excellent general purpose cleaner for most kitchen applications.

SP8910 – HEAVY DUTY HARD SURFACE CLEANER

This hard surface cleaner removes oil, grease, wax, inks, carbon, nicotine, mildew and other stubborn dirt. Cleans all machinery, lathes and can even be used to clean engines. Is ideal for cleaning floors, walls, ceilings and other vinyl furniture in factories, restaurants, canteens and kitchens.

INDUSTRIAL KITCHEN/BAR CLEANERS

A106 – BEER LINE CLEANER

A pip, pump and cellar tank cleaner which has a selected blend of non-silicate alkalis, non-foaming wetting agent, scale modifiers and sequestering agents. It is safe, efficient, simple to use and very economical.

B203 – THIXOTROPIC OVEN CLEANER

A sodium hydroxide based product which is a powerful composition containing special additives to boost the degreasing performance. The chemical is presented in the form of a thixotropic paste which clings to vertical surfaces.

B216 – HIGH ALKALINE OVEN CLEANER

A product which readily removes oils. Grease, fats and carbonised deposits from ovens grills and griddles. This product is non-flammable and will not support combustion. The oven cleaner can be provided with a sprayer to ensure easy access to all parts of the equipment to be cleaned. It can be used on stainless steel surfaces, mild steel, cast iron, vitreous enamel, ceramics, PTFE and most plastics.

B221 – MACHINE DISHWASH DETERGENT

Is a heavy duty liquid detergent concentrate, especially effective for the removal of caked on food debris and associated soils from dishware. This product is formulated for use with automatic dispensing equipment and can be used in hard and soft water.

B223 – MACHINE GLASSWASH DETERGENT

Is a heavy duty liquid detergent concentrate, especially effective for the removal of caked on food debris and associated soils from glassware. This product is formulated for use with automatic dispensing equipment and can be used in hard and soft water.

C315 – LOW FOAM DESCALER

This descaler is an aqueous blend of phosphoric acid and block polymers for the removal of lime scale deposits, it is also safe to use on stainless steel.

D421 – CREAM CLEANER

A dual purpose cream cleanser specifically formulated to remove felt pens, markers and lead pencils from PVCU extrusions. Buff with a clean dry cloth to bring back the lustre to white PVCU. Also effective at cleaning bathrooms and other ceramics around the house.

D430 – RINSE AID

This product is a concentrated high speed drying agent for injection into the final rinse of a dishwashing machine. It is safe and non-foaming at operating temperatures of 80-100°C.

JANITORIAL CLEANER

C301 – TOILET CLEANER AND DESCALER

A liquid toilet cleaner and descaler containing special additives to aid penetration and to control the growth of bacteria. It contains 13% hydrochloric acid, is pleasantly perfumed, inhibited to minimise metal attack and rapidly removes algae growth, uric acid and phosphate deposits which form unsightly accumulations in and around toilets, urinals and other sanitary fittings. Not to be used on stainless steel.

C308 - TOILET CLEANER AND DESCALER

This is a powerful and concentrated product specially designed to remove stubborn stains, water marks, rust etc. from toilets. The product contains 10% hydrochloric acid, wetting agents, inhibitors and a perfumed deodoriser. The thickening agent prolongs contact time and helps prevent accidental splashing and incorrect area application.

C309 - TOILET CLEANER AND DESCALER

A very powerful toilet cleaner and descaler which contains 19% phosphoric acid, so more suited to heavy duty applications. It also contains wetting agents, inhibitors, bactericide and a perfumed deodoriser. Is safe to use on stainless steel.

C310 - TOILET CLEANER AND DESCALER

Contains 10% phosphoric acid and is our toilet cleaner more suited to "domestic" applications, pleasantly perfumed and able to effectively remove stubborn stains, water marks and rust. Is safe to use on stainless steel.

D404 – METALLISED EMULSION FLOOR POLISH

Along lasting metallised floor polish which is easy to apply, dries evenly to a deep gloss, hard wearing and slip resistant finish. Can be used on plastic, vinyl, linoleum, rubber, terrazzo and sealed wood.

D403 – LOW FOAM CARPET & UPHOLSTERY CLEANER

A low foam detergent carpet and upholstery cleaner suitable for use on both natural and manmade fibres, cleans all types of carpets without leaving residue.

D410 – FLOOR MAINTAINER

A balanced blend of surface active agents and polymers with a pleasant fragrance for both cleaning and conditioning more kinds of hard floor surfaces.

A103 – POLISH STRIPPER & CLEANER

An alkaline built ammoniated detergent concentrate, containing solvents designed to strip metallised and non-metallised emulsion polishes from hard floors.

SP0958 – LEMON FLOOR GEL

This product is a lemon scented gel ideal for cleaning vinyl tiled areas and hard surfaces, it contains additives to facilitate buffering, therefore increasing shine and providing longer life to periodic floor treatments.

SP0948 – PINE FLOOR GEL

This product is a pine scented gel ideal for cleaning vinyl tiled areas and hard surfaces, it contains additives to facilitate buffering, therefore increasing shine and providing longer life to periodic floor treatments.

TRAFFIC FILM REMOVERS & VEHICLE SHAMPOO'S

B204 – HEAVY DUTY VEHICLE WASH

A high caustic product which is a combination of surface active agents, sequestrants, alkaline builders and solvents designed for use in heavy duty vehicle cleaning, particularly commercial vehicles. It is designed for use by a range of cleaning techniques and provides deep cleaning, degreasing and traffic film removal.

B205 – TRAFFIC FILM REMOVER

This non caustic traffic film remover is a combination of surface active agents, sequestrants and alkaline builders formulated for the cleaning of vehicles by hot or cold pressure wash equipment.

SP0929 – TRAFFIC FILM REMOVER

A traffic film remover which is a combination of surface active agents, sequestrants and alkaline builders designed for the use in the cleaning of vehicles by hot or cold water pressure equipment. The use of this product removes the need for mechanical agitation in vehicle cleaning and rapidly lifts, disperses and removes traffic film from vehicle surfaces.

D414 – CAR SHAMPOO WITH WAX

This is a product with a concentrated blend of surfactants which includes special waxes. Used as a car wash it provides deep cleaning and leaves a deep gloss, the product is mild in nature and will not affect the vehicles paintwork or other fittings.

D434 – VEHICLE SHAMPOO

A vehicle shampoo which is a concentrated blend of special surfactants and provides deep cleaning of all vehicles, with excellent beading properties.

SP0160 – TRAFFIC FILM REMOVER SHAMPOO

This is a non-caustic car wash shampoo quickly cleans heavy road dirt and imbedded film on vehicles without the need for scrubbing or wiping. It works equally well in both hard and soft water, with hot or cold water pressure wash equipment and will not cause streaking or dulling the surface. It is very economical and provides low cost maintenance of fleet vehicles. Excellent for use on aluminium, painted vehicles and also for cleaning engines and chassis.

SPECIALITY PRODUCTS

D401 – ALGAECIDE, BATERICIDE, & ANTI-STATIC AGENT

A product with a combination of special quaternary ammonium salts which optimises in one product, the outstanding biocidal and anti-static effects of these compounds. Suited to cleaning all food preparation areas and machinery as it is non tainting and has a low toxicity level.

D402 – MUD & SILT REMOVER

This product offers an effective treatment for removing partial blockages and reduced flow rate in water and drainage systems where the blockage is due to accumulations of particulate matter. Areas of use include sewage lines, drains, manholes, pipes, sumps, storm drains, gulley's, cooling towers, condensers, air compressors, heat exchangers, chilled water plants and central heating systems.

D409 – CONCRETE FLOOR SEALER

This is a water based, matt finished sealer for all porous masonry and concrete floor blocks. It protects against most common contaminants and makes cleaning easier and more efficient.

G704 – MULTI APPLICATION FLUID – DUCK OIL EQUIVALENT

Specially formulated to break through rust and corrosion on nuts, bolts and fittings. Its fast penetrating action dissolves rust and displaces moisture then lubricates threads and fittings.

G703 – PENETRATING FLUID

A fast action penetrating fluid and release agent. Superb migratory action penetrates rusted and seized fasteners. Specially formulated for the speedy release of sealed and corroded parts such as nuts, bolts, studs, pipe fittings and cables etc. Recommended for use in service industries, machine shops, garages, construction industry, scaffolding, municipalities and the marine industry.

E506 – BULK SILICONE MOULD RELEASE & POLISH

This is specially formulated for bulk use. The product is colourless and odourless. Treatment with E506 reduces surface friction and prevents adhesion of a wide range of glues, waxes, adhesives, resins and plastics. Textile treated with the chemical repels water, inks, coffee, tea, dyes, oil and grease.

E527 – SILICONE MASONRY TREATMENT

A special solution of methyl polysiloxane resin in hydrocarbon solvent which is designed for the superficial water-repellent treatment of masonry.

SPL013 – ODOUR & GREASE CONTROL CHEMICAL

A emulsifiable solvent composition based upon chlorobenzenes which have been designed to overcome offensive odours and to remove and control grease, slime and bituminous deposits from a wide range of materials. SPL013 overcomes offensive odours at source, controls the micro-organisms responsible to prevent reoccurrence and removes the greasy slimy deposits upon which the troublesome micro-organisms live.

SP9886 – CHEMICAL TOILET ADDITIVE

Designed for use in chemical toilets, it ensures that toilet facilities are fully hygienic and free from objectional odours.

SP9761 – GRAFFITI REMOVER

Developed as an environmentally safe graffiti remover. For use in removing coatings and graffiti where a pressure washer is not available and also for removing unusual staining from coatings following normal cleaning methods.
