

Assembly Instructions

1

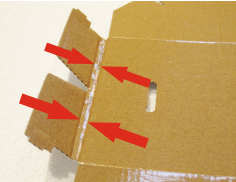

Remove wide strip at the end

2

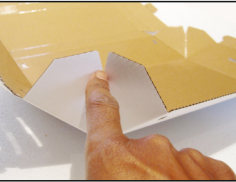

Lay shiny side up. Pre-bend all creases (except the 4 diagonals), upwards

3

Make sure the 2 folds that are close together at either end, are accurately & evenly folded

4

Push in corners. It might be easier if you bring adjacent sides up at the same time & push your finger nail into the crease

5

Push in a corner closest to the lid, then fold retaining flap over & down

6

Press into the corner to click in place

7

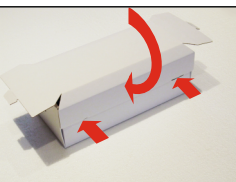

Complete the other corner closest to lid, then complete the 2 others in the same way

8

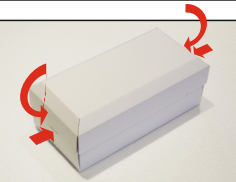

At this stage, place tissue into the box

9

Complete & lock lid by bending over the long side & push the 2 tabs in, until they click into place

10

Bend the other 2 sides over & push the remaining 2 tabs in, until they click into place
