## Why a Noorlander organ?

An organ should arouse your senses. The sound is very important but so is the organ console itself. Noorlander Organs leads in this field. Our organs have a very realistic (pipe) organ sound, thanks to very advanced Hauptwerk technology.

For optimal use of Hauptwerk we have developed special hardware and software.

Our organs have a fantastic sound reproduction system aided by a Noorlander Organ Manager. This software automatically regulates the power, audio and midi. The finishing touches can be done to match your other furniture. All operating controls are carefully disguised in the organ console.

We can offer you personalized advice and a premium guarantee. Do you need help? Through internet we can offer you the help you need.

▲ Adjustable lid to position sound

▲ Beautiful glossy piano look

▼ Piano design

### About Hauptwerk

#### Technology

Hauptwerk is a technology which we use for the sound reproduction. This computer programme makes it possible to play virtual pipe organs. The original pipe organs have been recorded pipe by pipe. And not only that, even the sounds of the tracker action and room acoustics have been included. All of these sounds combine to make what we call a *sample set*.

#### Organs

Many famous and important organs have been recorded for Hauptwerk and many more are to follow. The reality of the sound can be compared to that of a CD. Hauptwerk technology not only appeals to the imagination, but also brings your favourite pipe organ into your living-room.

The possibilities with Hauptwerk are almost endless.

## Harmonique

**Compact, chic and timeless. Fits in every interior. Modern or classic. This organ will be the show piece of your living-room.**

**“The timeless design of a piano, combined with the sound of the most beautiful organs”**

The Harmonique is constructed using quality components and attention to detail. Our consoles are built to last a lifetime. That is why we can adapt the colour to fit your interior.

The controls are easy to use. With the press of a button the organ automatically starts up and the last chosen sample set loads. After a quick start, you can produce the most beautiful sounds with your favourite, virtual (pipe)organ.

**Always wanted to play famous pipe organs?  
It is now possible, every day!**

Changing stops is easy with the 17” touch screen at eye level. After use, the screen can be stored behind the music rack thanks to our unique and robust retractable construction.

### This organ is unique for a variety of reasons:

- High end multi-channel audio system
- Speakers which are tilted upwards for a mild and less direct sound sensation
- Long distance help through internet
- Easily expanded with rear speakers (surround sound)
- Invisible speakers
- Your choice of finish and colour
- Also available in glossy black or white
- Unique piano look (registered model)

Touchscreen can easily be placed behind the music rack
