## Why a Noorlander organ?

An organ should arouse your senses. The sound is very important but so is the organ console itself. Noorlander Organs leads in this field. Our organs have a very realistic (pipe) organ sound, thanks to very advanced Hauptwerk technology.

For optimal use of Hauptwerk we have developed special hardware and software.

Our organs have a fantastic sound reproduction system aided by a Noorlander Organ Manager. This software automatically regulates the power, audio and midi.

The finishing touches can be done to match your other furniture. All operating controls are carefully disguised in the organ console.

We can offer you personalized advice and a premium guarantee. Do you need help? Through internet or telephone, we can offer you the help you need.

▲ LED dimmer and headphone connection

▲ Solid wood bench lid

▼ Unique and durable slide-in construction

### About Hauptwerk

#### Technology

Hauptwerk is a technology which we use for the sound reproduction. This computer programme makes it possible to play virtual pipe organs. The original pipe organs have been recorded pipe by pipe. And not only that, even the sounds of the tracker action and room acoustics have been included. All of these sounds combine to make what we call a *sample set*.

#### Organs

Many famous and important organs have been recorded for Hauptwerk and many more are to follow. The reality of the sound can be compared to that of a CD. Hauptwerk technology not only appeals to the imagination, but also brings your favourite pipe organ into your living-room.

The possibilities with Hauptwerk are almost endless.

## Fugara II

A Noorlander Hauptwerk organ with a unique price to quality ratio. Additions can be easily realised when it comes in handy for you. For instance, you can add a third keyboard, a second touch screen or additional sample sets, when you want.

The Fugara is constructed using quality components and attention to detail. Our consoles are built to last a lifetime. That is why we can adapt the colour to fit your interior.

The controls are easy to use. With the press of a button the organ automatically starts up and the last chosen sample set loads. After a quick start, you can produce the most beautiful sounds with your favourite, virtual (pipe)organ.

**Always wanted to play famous pipe organs?  
It is now possible, every day!**

Changing stops is easy with the 17" touch screen at eye level. After use, these screens can be slid back into the console. Safe and out of view. And that thanks to our unique and robust sliding construction.

### This organ is unique for a variety of reasons:

- High end multi-channel audio system
- Speakers which are tilted upwards for a mild and less direct sound sensation
- Long distance help through internet and telephone
- Easily expanded with rear speakers (surround sound)
- PC with SSD and 1 TB hard drive
- 11 free sample sets (preloaded)
- Headphone connection
- USB slot in the front of the console
- Hauptwerk Advanced software
- 17" touch screen, ergonomically positioned and retractable
- Slide-in pedal board
- Adjustable bench
- 2 wooden swell pedals
- No visible speakers
- Personalized colour and finishing
- Completely optimized for Hauptwerk
- Finished with special finish to prevent colouring of the oak wood
- Compact console in a timeless design
