17	Terms And Conditions

Welcome to Ocean Ceramics

Here at Ocean Ceramics we specialize in manufacturing eco friendly specialist products for the aquatics and exotics trade.

Everyone at Ocean Ceramics is bonkers about all things fishy and are experienced hobbyist reef keepers which is why we started manufacturing.

When I began keeping reef tanks back in 1999 / 2000 I instantly fell in love with the hobby and quickly realized the hobby needed to not only become more sustainable but also the choice of specific reef related products was very limited.

As my love for coral propagation grew I set out to make some frag plugs which were just for my own use. These worked ok but over the years I played around with different designs and as the frag plugs evolved I kept getting asked where people could get the plugs from.

Eventually in 2010 we decided to set up to supply our products to the trade. Our plugs have evolved a great deal since we started.

We have now substantially grown all our product range and are constantly developing products to evolve to the needs of the hobby as interest grows.

We are based in Sheffield; England and we are proud to manufacture all our own products in the UK.

Ceramic Frag Plugs

Our ceramic frags plugs come in many great shapes and sizes to suit most applications . They suit both the hobbyist and large-scale aquaculture facilities. Ceramic plugs have many advantages over aragonite plugs as they can be made slimmer due the extra strength of the ceramic material. They can be very discreet , keeping all the attention on the frag its self. The smoother surface of the ceramic also makes the frag plugs easier for the clean up crew to keep the bases clean and tidy as algae does not grow as easily on the surface.

Due to the design of our plugs the ceramic plugs can be lighter than the aragonite alternatives which can help when frags are being shipped therefor putting less stress on the frags.

Unlike aragonite plugs our products will not leach into the water and do not need curing .

Ocean Ceramics

Ceramic Small Frag Plugs

- 20mm Frag plug top
- Dished Frag plug surface
- Textured frag plug surface
- 12mm Frag plug stem
- Tapered frag plug Stem
- Tested , developed and evolved since 2010

- 12mm frag plug stem (at base) ideal for use with Ocean Ceramics range of frag racks , rocks as well as universal egg crate
- Tapered Frag stem which improves the fit into frag rack holes and after months of testing we found the plugs are less susceptible to being dislodged due to snails or high flow
- 15mm long stem to help provide extra stability in the frag rack

- 20mm disk diameter ideal for Zoanthids , Sps Corals
- Unique textured frag surface enhances bond strength of adhesive which ensures a strong bond between frag plug and coral
- Ocean Ceramics signature dished plug surface further enhances mechanical strength of bond to the plug. Also protects from harsh flow further minimising frag losses speeding up the healing process

Ceramic Small Frag Plugs

- 20mm disk diameter
- 12mm stalk diameter (+/- 1mm)
- 5g per Plug
- Extra strong ceramic
- Deep dished disk for good frag mechanical strength
- Can be used with egg crate

- Breeder packs of 50 Frag Plugs
- Approximate weight 170gram
- RRP £14.99
- Order code = FP13

- Breeder packs sold by weight
- Approximate weight 1KG
- Approximate qty 300 plugs
- Order code = FP013

Ocean Ceramics

Ceramic Medium Frag Plugs

- 27mm Frag plug top
- Dished Frag plug surface
- Textured frag plug surface
- 12mm Frag plug stem
- Tapered frag plug Stem
- Tested , developed and evolved since 2010

- 12mm frag plug stem (at base) ideal for use with Ocean Ceramics range of frag racks , rocks as well as universal egg crate
- Tapered Frag stem which improves the fit into frag rack holes and after months of testing we found the plugs are less susceptible to being dislodged due to snails or high flow
- 15mm long stem to help provide extra stability in the frag rack

- 27mm disk diameter ideal for most corals Zoanthids , encrusting Sps Corals
- Unique textured frag surface enhances bond strength of adhesive which ensures a strong bond between frag plug and coral
- Ocean Ceramics signature dished plug surface further enhances mechanical strength of bond to the plug. Also protects from harsh flow further minimising frag losses speeding up the healing process

Ceramic Medium Frag Plugs

- 27mm disk diameter
- 12mm stalk diameter
- 4.9g per disk
- Extra strong ceramic
- Textured surface for great glue adhesion
- Deep dished disk for good frag mechanical strength

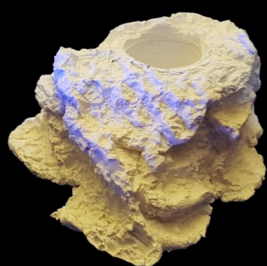

- Breeder packs of 60 Frag Plugs
- Approximate weight 380 gram
- RRP £29.99
- Order code = FP14

- Breeder packs sold by weight
- Approximate weight 870g
- Approximate qty 180 plugs
- Order code = FP014

Ceramic Frag Rocks

Our ceramic frag rock range is designed to be used in marine aquariums to enable easy frag placement and create stunning centre pieces. All our frag rocks are made from porous ceramics which means that they will contribute to the filtration in the system once bacteria has had chance to colonise. Not only does this create a perfect habitat for both de nitrate and nitrite bacteria. But it also makes our rock support these bacteria for much longer if the rock is exposed to air in the event of a power cut or movement of the rocks due to the superb wetting properties. This helps prevent bacteria die off which in turn prevents spikes in the aquarium water.

All our frag rocks are hand made and come in a wide variety of sizes to suit most applications.

1-Hole Reef Rocks

- Designed to be used with our range of frag plugs
- Enables you to easily grow frags without the need for frag racks
- Excellent wetting properties meaning bacteria survives longer out of water
- Highly porous with wide range of pore sizes to offer bacteria space to colonise
- Includes Free Frag Plugs

1-Hole frag rock

Packs of 5

RRP £14.99

Order Code = FR40

3-Hole Reef Rocks

- Designed to be used with our range of frag plugs
- Enables you to easily grow frags in close proximity creating stunning displays
- Excellent wetting properties meaning bacteria survives longer out of water
- Highly porous with wide range of pore sizes to offer bacteria space to colonise
- Includes free frag plugs

3-Hole frag rock

Pack of 2

RRP £14.99

Order Code = FR41

5-Hole Reef Rocks

- Designed to be used with our range of frag plugs
- Enables you to easily grow frags in close proximity creating stunning displays
- Excellent wetting properties meaning bacteria survives longer out of water
- Highly porous with wide range of pore sizes to offer bacteria space to colonise
- Includes free frag plugs

5-Hole frag rock

1 Per pack

RRP £14.99

Order Code = FR42
