

Enhance

and add value to your home with custom-built **Visage** windows, doors & conservatories

Visage[®] *Beautifully made. Reassuringly strong.*

HIGH SECURITY UPVC WINDOWS & DOORS

Visage®

So much nicer to come home to...

In an everchanging world it's reassuring to know that there are still some things in life you can really rely on.

Style, strength, warmth, safety and security are things we all strive for and value.

As a homeowner, it's comforting to know that Visage® embraces these values in a window, door and conservatory system that surpasses all expectations and sets the standards for others to follow.

Beautifully made. Reassuringly strong. Visage® is so much nicer to come home to.

Contents

Stylish, Safe.

As one of the very best systems on the market, we're convinced you can't buy better. But don't just take our word for it! Follow this easy to use tick chart and see for yourself.

Pages 16 - 18

Stylish

With a comprehensive selection of styles and designs to choose from you can be confident that **Visage** will enhance your home

Visage **TOTAL70**
Bevelled

Visage **TOTAL70**
Sculptured

Choose from traditional chamfered frames or a stylish sculptured finish.

Our range is available in brilliant white, golden oak, and rosewood, or a rich rosewood or oak finish on the outside and brilliant white on the inside, and now a superb range of colours as shown on page 8.

Visage® The comfort in knowing that you've chosen the right product for you and your home

Visage® excels in providing a choice of innovative design options aimed at reducing the risk of injury for everyone in the home.

Nothing has been left to chance and no compromises have been made in the pursuit of a highly secure and safe product range.

Visage® can offer essential means of escape in the event of a fire, prevent young children from falling from first floor windows with the convenience of traditional locking.

Restrictor Hinge

A thoughtful touch, the restrictor hinge (available as an option) keeps young children safe and secure whilst being child-proof in operation.

This innovative hinge limits the opening of the window preventing anyone from accidentally falling. A pressure pad concealed within the hinge mechanism allows the window to be opened fully by an adult.

The restrictor hinge is recommended for windows fitted in children's bedrooms.

Safe

Options

The quick exit hinge can be opened to allow an unrestricted means of escape in an emergency while the easy clean facility is designed for everyday use.

Secured by Design

Official Police Security Initiative

"Secured by Design"

is the official UK Police initiative supporting effective crime prevention and security standards for a large range of products.

- The SBD logo is the only symbol that guarantees national Police approval of a product.
- "Visage" windows and doors meet the "Police Preferred Specification" and as such are "Secured by Design"

Secure Visage® The ultimate high security

The Visage® window, door & conservatory system is fully engineered to meet the everyday occurrence of break-ins, severely limiting chances of successful intrusions over lesser specified windows. Here we explain the features & benefits of this high security PVCu system, plus why we believe that every home should have them.

3 4 5 6

Hardened steel shootbolt and roller locking – an uncompromising combination

The solid, bi-directional locking bolts anchor the opener securely into the top and bottom of the frame and, with the roller locking, ensures the opener receives all-round protection.

STRONG PRECISION SHOOTBOLTS ON WINDOW TOP & BOTTOM

ROLLER ON WINDOW TOP AND BOTTOM

STRONG STEEL MECHANISM BANDING

3

4

7

Locking wedge

Fitted at the hinge side of windows over 800mm, the locking wedge acts as an additional anti-lever security device.

7

2

1 2

Hingeguards

Hingeguard is the ideal solution to the provision of extra security to the hinged side of a window. Designed to engage only when the window is under attack, the security plates prevent disengagement by supporting the friction hinge.

Extensive testing has confirmed that where Hingeguard security plates are used in conjunction with friction hinges, the windows have exceeded the security requirements of BS 7950.

- Tested to 30,000 cycles (55 years heavy usage)

FIRM CLOSURE PROVIDES A WEATHER TIGHT AND SECURE SEAL

HINGEGUARD STAINLESS STEEL CONSTRUCTION

SMOOTH AND TROUBLE FREE OPERATION

The steel screws used to assemble Visage® windows and doors are of a grade that have been independently tested to withstand 500 hours of highly corrosive salt spray.

8

Centre lock

The next generation of window locking, with its central twin locking, replaces the out-dated single deadbolt. The twin locks powerfully grip the window frame, preventing potential attack from a jemmy or crowbar. Visage® windows have been tested to BS 7950, the British Standard that relates to resistance against forced entry.

5

6

GUARANTEE

In the unlikely event of a break-in, Yale will pay up to £1000 towards your insurance costs (terms and conditions apply - ask your retailer for details).

system - Designed to prevent intrusion and be tough on crime.

High Security PVCu Doors

4 5

Hingebolts

Two protruding hingebolts make the door secure on the hinge side by snugly fitting into an aperture in the frame's steel reinforcement.

1 2 3

Endurance tested hinges

Powerful hinges fitted as standard.

8 9

Hardened hookbolts

Two Hookbolts and trademark anti-lift pins for the highest level of security

13

Stainless Steel Handles

for ultimate corrosion free performance

10

Central Deadbolt

Centre deadbolt secures and protects the centre of the door from attack and makes it one of the strongest and most durable systems on the market.

6 7

Rollercam locks

4 bi-directional rollercams guide the lock into position and are used to help the door make a weathertight seal in its frame. They also act as an effective anti-lever device.

12

Latest one-piece steel locking keep new

The keep runs down the entire depth of the door, giving maximum security.

Slam shut option on doors.

The slam shut facility is available as an option on single doors, offering a similar operation to a conventional latch associated with a traditional wooden door: Once the door is closed it can only be opened from the outside with a key. To fully engage the locking system the handle must be raised and key locked.

Unlike some lesser specified door systems, corrosion-resistant, hardened steel screws are used throughout and all of the locking keeps are screwed into the steel reinforcement and not just the plastic!

Stylish - Safe - Secure

Eco-friendly

With an ever increasing focus on helping the environment, Visage offers a range of energy efficient windows and doors designed to retain heat and significantly reduce the amount of energy you use and the money you spend on heating costs.

In accordance with the Kitemark Window Energy Rating Scheme and Energy Saving Trust guidelines, Visage windows meet the requirements of the A-G energy rating scale* (this is a similar scale to that which can be found on many household white goods.)

- Windows and doors rated grade C and above are recognised as being energy efficient. In keeping with the government's plan to reduce carbon emissions, Visage's Energy Efficient windows and doors enable you to lower household CO₂ emissions, thus reducing your carbon footprint.
- From October 2010, the Building Regulations state that it is mandatory to install at least C rated windows.
- Our pledge to helping the environment doesn't end here, we are also committed to minimising the amount of waste produced during the manufacturing process and aim to recycle as many waste materials as possible.

* Subject to glass construction used

Visage® Fully integrated for better performance and better looks

With Visage® windows and doors, the glazing gasket is manufactured as an integral part of the PVCu frame and glazing beads. This improved specification makes a surer seal around the whole of the frame; prevents the problem of gasket shrinkage; and, because they are slimmer and flush with the frame, the gaskets are less visible.

A+ WER Windows now available in the 5 Chamber TOTAL White System.

Latest Triple Glazed option for 'U' values down to 1.2 w/m²k as standard and even as low as 0.9 w/m²k.

Windows

Internally glazed with a choice of designs and glazing styles, Visage windows allow you to transform your home to suit your individual taste.

Constructed using some of the finest, low maintenance materials, Visage is available in a choice of effects, with additional options of Rosewood or Oak finishes and even coloured profiles.

NEW VUELTA BY Visage® FLUSH SASH WINDOW

NEW VUELTA BY Visage® FLUSH SASH WINDOW

The Vuelta Flush Sash by Visage window is the first of its kind. It offers slim frames in thirteen standard colours and authentic timber-look joints, combined with the practicality of a fully welded PVCu window.

With the sash sitting flush within the frame, Flush Sash styling emulates 19th century window design, providing the perfect options for heritage homes. For contemporary properties, the clean lines and sleek appearance of the Vuelta Flush Sash create a beautifully modern appearance, especially in our large selection of contemporary colour ways.

Call: 0161 339 2433 Visit: visageonline.co.uk

The unique new jointing and welding process produces the external character of a perfect timber joint without compromising performance. Inside, the precision weld is almost seamless, resulting in a strong, thermally efficient window with no risk of air leakage.

Unique timber look joints with all the strength and easy installation you expect from a fully welded window

Visage

The perfect option for heritage homes or contemporary properties

Visage®

Quality is in the weld detail

It's taken almost a year to develop Visage Flush Sash and it started with a completely new machine to create the perfect timber-look weld. The unique new jointing and welding process produces the external character of a perfect timber joint without compromising performance. The precision weld is strong, thermally efficient and has no risk of air leakage.

Q-Lon outer seal

The Visage Flush Sash window features a neat Q-Lon outer seal between the sash and outerframe. Q-Lon compresses easily to fill the gap and then returns to its original shape when the sash is opened. This removes the need for an unsightly brush seal.

Designer handles

Our range of designer handles offer a high-quality look and feel. There's a choice of finishes and a heritage range with matching dummy pegs and stays.

Colours

We think you'll like the collection of 13 standard colour options. These feature the latest trending shades and classic favourites. The collection includes Agate Grey and natural wood stain finishes. See back page for options.

Visage® FLUSH SASH Colour Range

Optional colour matched Georgian Bars

* The shown PVC colour references are not as exact match with the full colours and are for guidance only. Colour images are for guidance only and the actual may vary from the actual window. The colours shown on this chart may give an indication of shade. No guarantee can be given they will exactly match the product. To see the exact colour, please ask your Visage representative for a colour match.

Tilt & Easy Clean Function

Low maintenance ECOSlide PVC-U sash windows only require a quick wipe down with a damp cloth to keep them looking as good as new. The window sashes feature an inward opening tilt facility to allow easy and safe cleaning of the outside frame and glass from inside the building. This is particularly useful for multi-storey windows or windows positioned in hard to reach places.

ECOSlide PVC-U sash windows primarily function like a wooden box sash window with both the top and bottom sashes sliding up and down to suit your ventilation requirements.

Convenient and simple to operate, the two sliding sashes within an outer frame work independently of each other on a balanced load mechanism, designed to hold the sash at any height.

Design Number

Sash Window Styles

ECOSlide windows are available in a range of popular sash window design styles to provide 21st century modern replacements for original windows, including splayed and 90o box bay-style windows. We can also manufacture bespoke units in eye-catching architectural shapes such as True Arch, Gothic Arch and Swept Head windows. Transom drops are 50/50 split as standard. Other transom drops can be manufactured to order, but the transom drop will be determined by the grid layout. Other additional design options are available with internal Georgian glazing bars or external Astragal glazing bars.

Doors

With a wide range of residential doors, patio and French doors, Visage enables you to purchase quality products that will suit your property and satisfy your personal tastes

Visage® Designs to suit the most discerning - practical and stylish.

Residential doors

A combination of style, multi-point security and warp-free weatherproofing. Meticulously designed to keep out the wind, rain and unwelcome visitors. Visage® doors are not only durable but highly desirable.

Standard specifications include a fully welded frame, corrosion resistant fixings, stainless steel locks for smooth and consistent operation and galvanised steel reinforcement used where necessary for extra strength.

Stable Door

Composite doors

Solid high security doors that perfectly replicate the look and feel of timber in a low maintenance weatherproof finish that's guaranteed to last for years.

These beautifully moulded and richly grained doors are available in a range of elegant styles and colours to suit your style and individual taste. For more details please ask your retailer for a Visage® composite door brochure.

Colour Options

Patio and French doors

For both aspects, inside and out, Visage® Patio and French doors add a graceful, luxurious touch to any home or conservatory. Practical and convenient in configuration, their wide opening provides maximum ventilation and unrestricted access - not to mention a wonderful, satisfying view of your garden.

Stylish but also very secure. The Visage® inline patio door is assembled in a way that makes it impossible to remove the sliding door from the outside and anti-lift, anti-lift and multi-point locking devices make Visage® more than a match for opportunist thieves who often view rear entrances as an easy route for forced entry into a home.

- 1 Anti-lift device, & running guide to improve location.
- 2 4 high security hookbolt locks built into a 1-piece keep.
- 3 Stainless steel track rollers for smooth operation.
- 4 Durable aluminium threshold.
- 5 Anti-lift devices.
- 6 Cushioning buffers-top and bottom.
- 7 Co-extruded twin glazing gasket.
- 8 Steel reinforced outer frame and sash.

Visage® French doors

Whilst still featuring the same build quality and security used in residential doors, the Visage® French door also offers locking handles on both doors operated by the same key.

Visage® Bi-folding doors

Enjoy the benefits of the outdoors with our innovative range of Bi-fold doors. These elegant, concertina doors add a real 'wow factor' to any home and create a large opening for easy access once folded back.

What to look for in a window or door

We're confident you can't buy better!

The outward appearance of most replacement windows and doors can be almost identical, but don't be fooled into thinking that all windows and doors are more or less the same. The quality of materials, construction, overall design, locking and weatherproofing systems can vary immensely from manufacturer to manufacturer. To help make you aware of the features you should consider when buying windows and doors, we've listed the main things to look for on this easy to use checklist. The specifications shown are standard on every Visage® window and door (unless shown as optional) and, as one of the very best systems on the market, we're convinced you can't buy better. But don't just take our word for it!

To compare our products with that of any of our competitors, please feel free to fill in the check boxes below.

Windows

	Visage®	Other	Other
Full 70mm frame depth with 3mm wall thickness. Stronger, improved thermal and acoustic performance and better fit with the existing plaster-line than 60mm systems.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Load bearing baypole. Makes the framework of windows that have to support walls or heavy loads structurally sound. (Optional)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Low level, integrated gasket. Less obtrusive, integrated gasket gives the window a cleaner appearance while providing an effective barrier against the British weather	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Centre locks. The next generation of window locking, with central twin locking. The twin locks powerfully grip the window frame, preventing potential attack from a jemmy or crowbar.
