

### “Green Chemistry”

Lovibond is committed to improving the environment - reagents that are easy to use, that are safe, have a long and stable shelf-life, are extremely accurate, provide reproducible results, and are environmentally friendly.

- \* 100% free of Boric Acid
- \* Exact reagent quantity
- \* DIN EN ISO 7393-2 Compliance
- \* Optimal pH buffer system
- \* Strict quality monitoring & assurance

## Test Tablets for Lovibond Photometers

| Code               | Description                       | Price             | Code         | Description                 | Price   |
|--------------------|-----------------------------------|-------------------|--------------|-----------------------------|---|
| <b>WT37</b>        | <b>DPD No 1</b>                   | <b>Box of 250</b> | <b>17.50</b> | <b>Calcium Hardness:</b>    |   |
| WT337              | DPD No 2                          | Box of 250        | 18.50        | WT461                       | Calcheck Box of 250 42.50                     |
| <b>WT38</b>        | <b>DPD No 3</b>                   | <b>Box of 250</b> | <b>17.50</b> | WT431                       | Calcio <b>Combi Pack</b> 2 Boxes of 250 75.00 |
| WT384              | DPD No 4                          | Box of 250        | 21.00        |                             | Calcio H No.1 & No.2 tablets                  |
| <b>WT39PH</b>      | <b>Phenol Red</b>                 | <b>Box of 250</b> | <b>17.50</b> | WT444                       | Cyanuric Acid Box of 250 42.00                |
|                    | High Calcium Levels: Over 500mg/l |                   |              | WT57C                       | Copper <b>Combi Pack</b> 2 Boxes of 250 POA   |
| WT37H              | DPD No.1 <b>High Calcium*</b>     | Box of 250        | 22.00        | WT67                        | Copper No.1 & No.2 tablets Box of 250 POA     |
| WT38H              | DPD No.3 <b>High Calcium*</b>     | Box of 250        | 22.00        |                             | Iron LR                                       |
|                    | High Chlorine Levels: 0 - 10ppm:  |                   |              | <b>Ozone:</b>               |   |
| WT37HR             | DPD No.1 <b>High Range</b>        | Box of 250        | 17.50        | WT384                       | Oxygen - DPD No.4 Box of 250 POA              |
| WT38HR             | DPD No.3 <b>High Range</b>        | Box of 250        | 17.50        | WT562                       | Glycine Tablets Box of 100 POA                |
|                    | <b>Bromine:</b>                   |                   |              | WT72C                       | Phosphate LR 1 & 2 2 Boxes of 100 POA         |
| WT37               | DPD No.1                          | Box of 250        | 17.50        | <b>Sodium Hypochlorite:</b> |   |
| <b>Alkalinity:</b> |                                   |                   |              | WT98                        | Chlorine High Range Box of 100 POA            |
| WT451              | Alka-M                            | Box of 250        | 32.50        | WT99                        | Acidifying Tablets Pack of 250 POA            |

## Reference Standards for Lovibond Photometers

| Code                              | Description                           | Price |
|-----------------------------------|---------------------------------------|-------|
| <b>MD100 / MD200 Photometers:</b> |                                       |       |
| 275655                            | Ref Standard - Chlorine 0.5 / 2.0mg/l | 69.00 |
| 275670                            | Ref Standard - pH 7.45                | 69.00 |
| <b>PM600 / PM630 Photometers:</b> |                                       |       |
| 215630                            | Ref Standard - Chlorine 0.5 / 2.0mg/l | 69.00 |
| 215665                            | Ref Standard - pH 7.45                | 69.00 |

Reference Standards are designed to check the accuracy of your photometer  
\*The reference standards have a shelf life so only order when needed\*

Lovibond offers a Laboratory Photometer Calibration Service if required.

## LOVIBOND TurbiCheck with infra-red light source (EN ISO 7027)

| Code | Description  | Price |
|------|--|-------|
| WT08 | TurbiCheck - Infra-red Turbidity Meter<br>Instrument supplied in carrying case, 4 turbidity standards (<0.1, 20, 200 & 800NTU), 9v Battery, 2 Vials (24mm dia.) with lids, Guarantee sheet, Certificate of Compliance & Instruction Manual. (19 41 50) | POA   |
| WT64 | Set of 12 empty vials - 24mm dia. (19 76 555)  | POA   |

The compact Lovibond infra-red turbidity meter **TurbiCheck** is designed to allow fast, precise on-site testing. The unit measures the scattered light at an angle of 90 degrees, as stipulated to EN ISO 7027.

## Spares for Photometers

| Code  | Description                                  | Price |
|-------|--|-------|
| WT191 | Lovibond (PCCheckit) Round Glass 10ml - Each | 7.00  |
| WT196 | Box of 12 x WT191                            | 70.00 |
| WT22  | Test Tube Brush                              | 2.50  |
| WT23L | Plastic Crusher - long (130mm long)          | 1.60  |
| WT20  | 10ml Syringe                                 | 1.50  |
