

Sauna LED Downlighting System - WHITE & AMBER

SA90 55mm Front Plate dia. with 50mm domed lens 	SA93-6 6 Way Plug & Play Unit  NEW
SA99-5 	SA93-10 10 Way Plug & Play Unit  NEW
SA94 	

The **Plug & Play Units** offer the ability to avoid time-consuming & messy wiring arrangements. Simply connect the Plug & Play Unit into a 240v source, plug in the first lamp in the empty connection point.

To fit 2 or more lamps, simply remove the plug and connect your next lamp. Continue up to 6, or 10 whichever Plug & Play Unit you have

The LED Downlight System has been tested & proven in high temperature saunas with great success.
All LED lights must be wired in series - failure to do so may cause irreparable damage to LED light units.
 The use of the Plug & Play Units is recommended.

Code	Description	Price
SA90W	White LED Downlight - 1w 350mA c/w 3m Ext	75.00

Why we currently do not sell E27 St.ES & E14 SES screw-in LEDLight Bulbs for Saunas

Standard E27 & E14 LEDLight Bulbs operate satisfactorily up to a maximum temperature of approx. 60degC. If your sauna operates above this temperature, the lifespan of many screw-in LED Light Bulbs will be significantly affected. Until screw-in type High Temperature LED Bulbs are available for sauna applications, we are only offering the traditional tungsten filament light bulbs detailed above.

We offer our high temperature LED Downlighter System detailed on page 48 of the Website Catalogue. This system is also applicable to Steam Room applications - page 82.
