multifunctional column

innovation base

## wellness anno domini 1751

The >>bidet<< is often privately owned by noble class people. It's state of the art and for longer times a sign of social distinction.

The bidet is made in two parts: a wooden chair and a built-in enamel basin. The basin is tasteful decorated and luxurious equipped. Because of the backrest and the cover close up the basin, the bidet can be used as a chair.

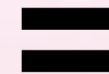

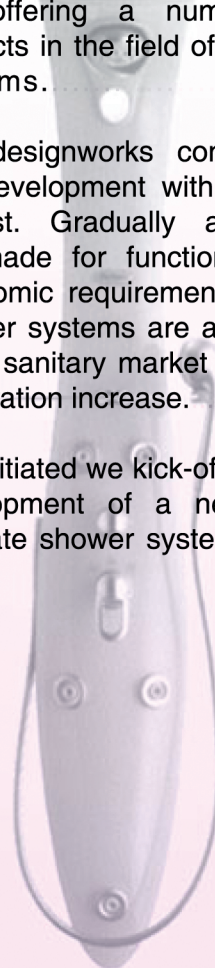

## wellness anno domini 2007

ISH 2007, several companies are offering a number of products in the field of shower systems.

thor designworks considered this development with special interest. Gradually analyses are made for functional and ergonomic requirements. Shower systems are accepted in the sanitary market and the penetration increase.

Self initiated we kick-off design development of a new and innovate shower system.

## wellness-innovation 2018

thor designworks designed a multifunctional column with integrated seat and including intim-showerjet. These product will be an innovation in the field of shower systems. The design joins together with contemporary architectural style.

Multifunctional column offers wellness facilities and various applications are possible:

- > handshower, rainshower
- > cascade, waterfall
- > vertical massage jets
- > "Kneipp"-pipe
- > intim showerje
- > foot showerjet

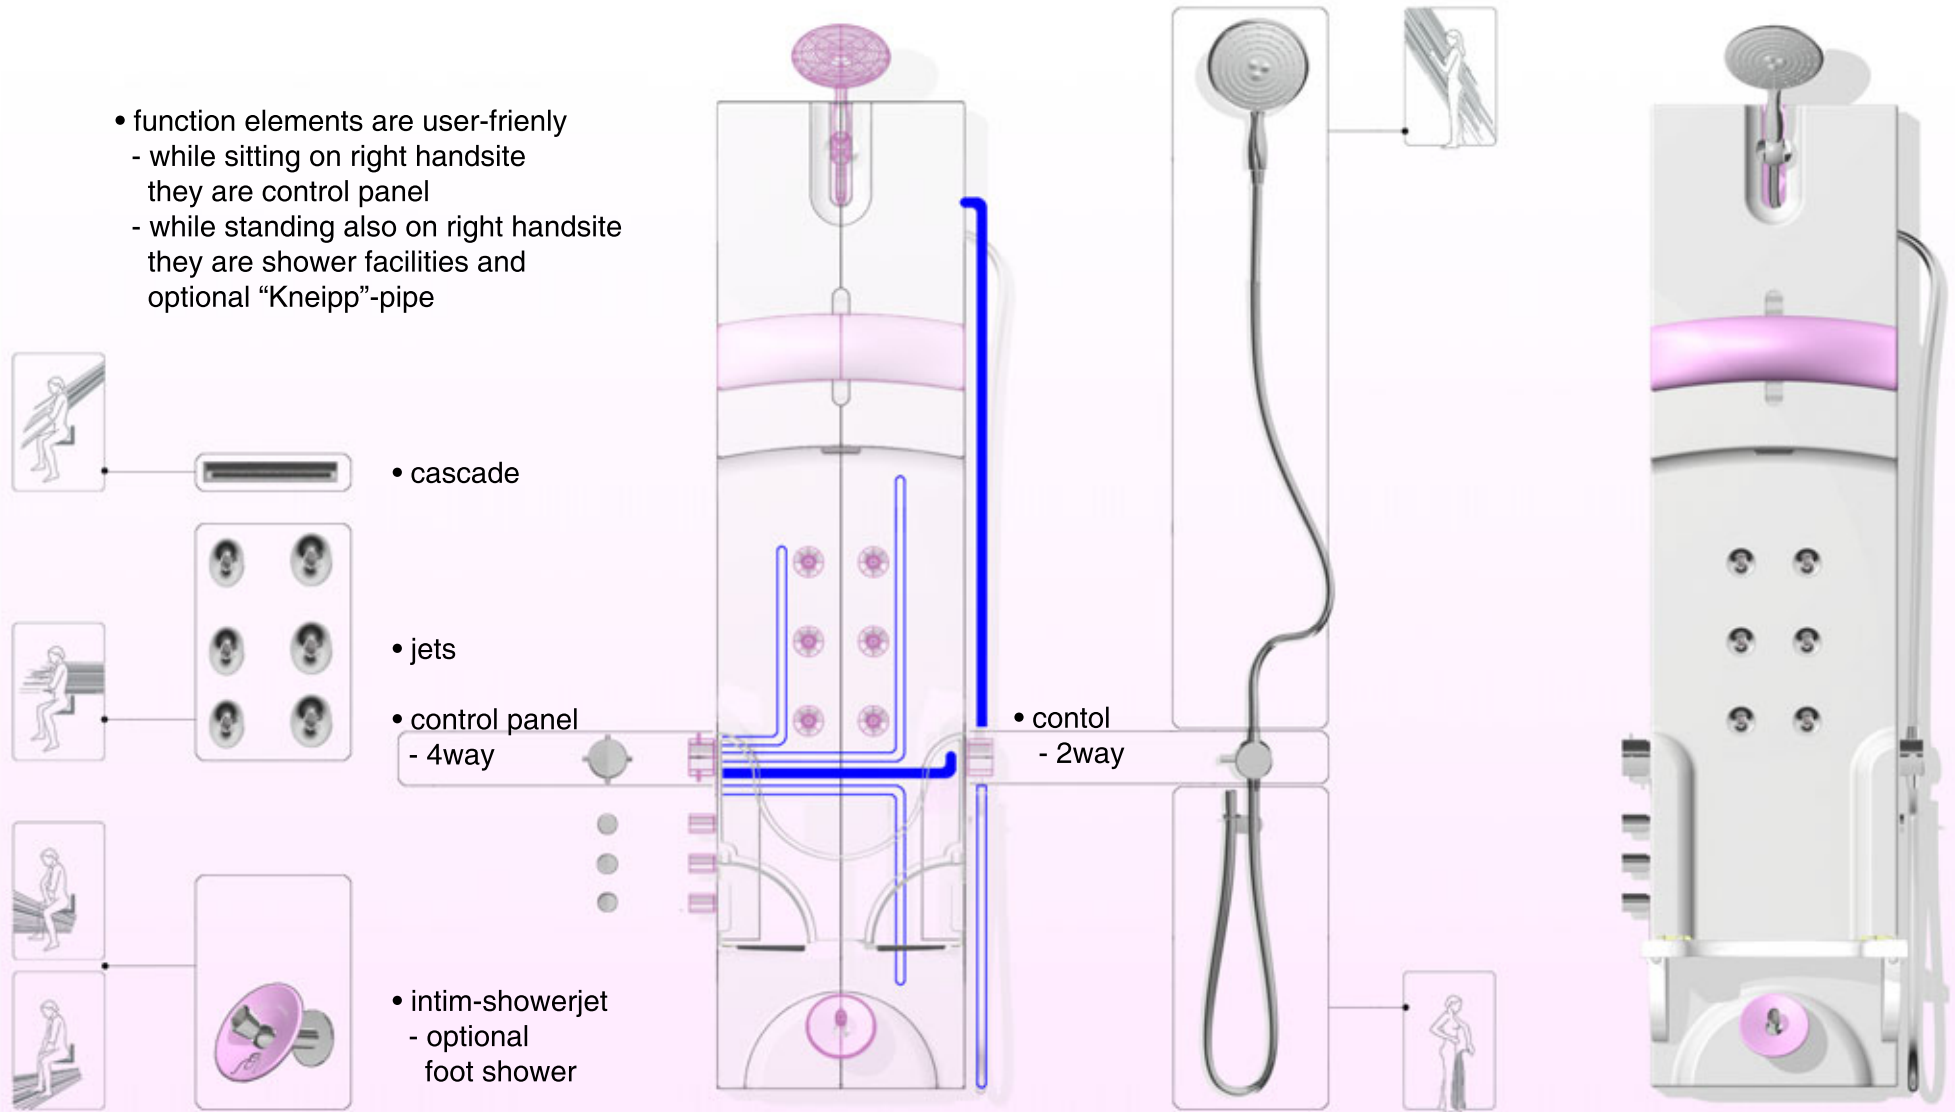

Take a shower, just relax while sitting you enjoy the wellness feeling!

design conception

multifunctional column XL

innovation in function

- function elements are user-friendly
  - while sitting on right handside they are control panel
  - while standing also on right handside they are shower facilities and optional "Kneipp"-pipe

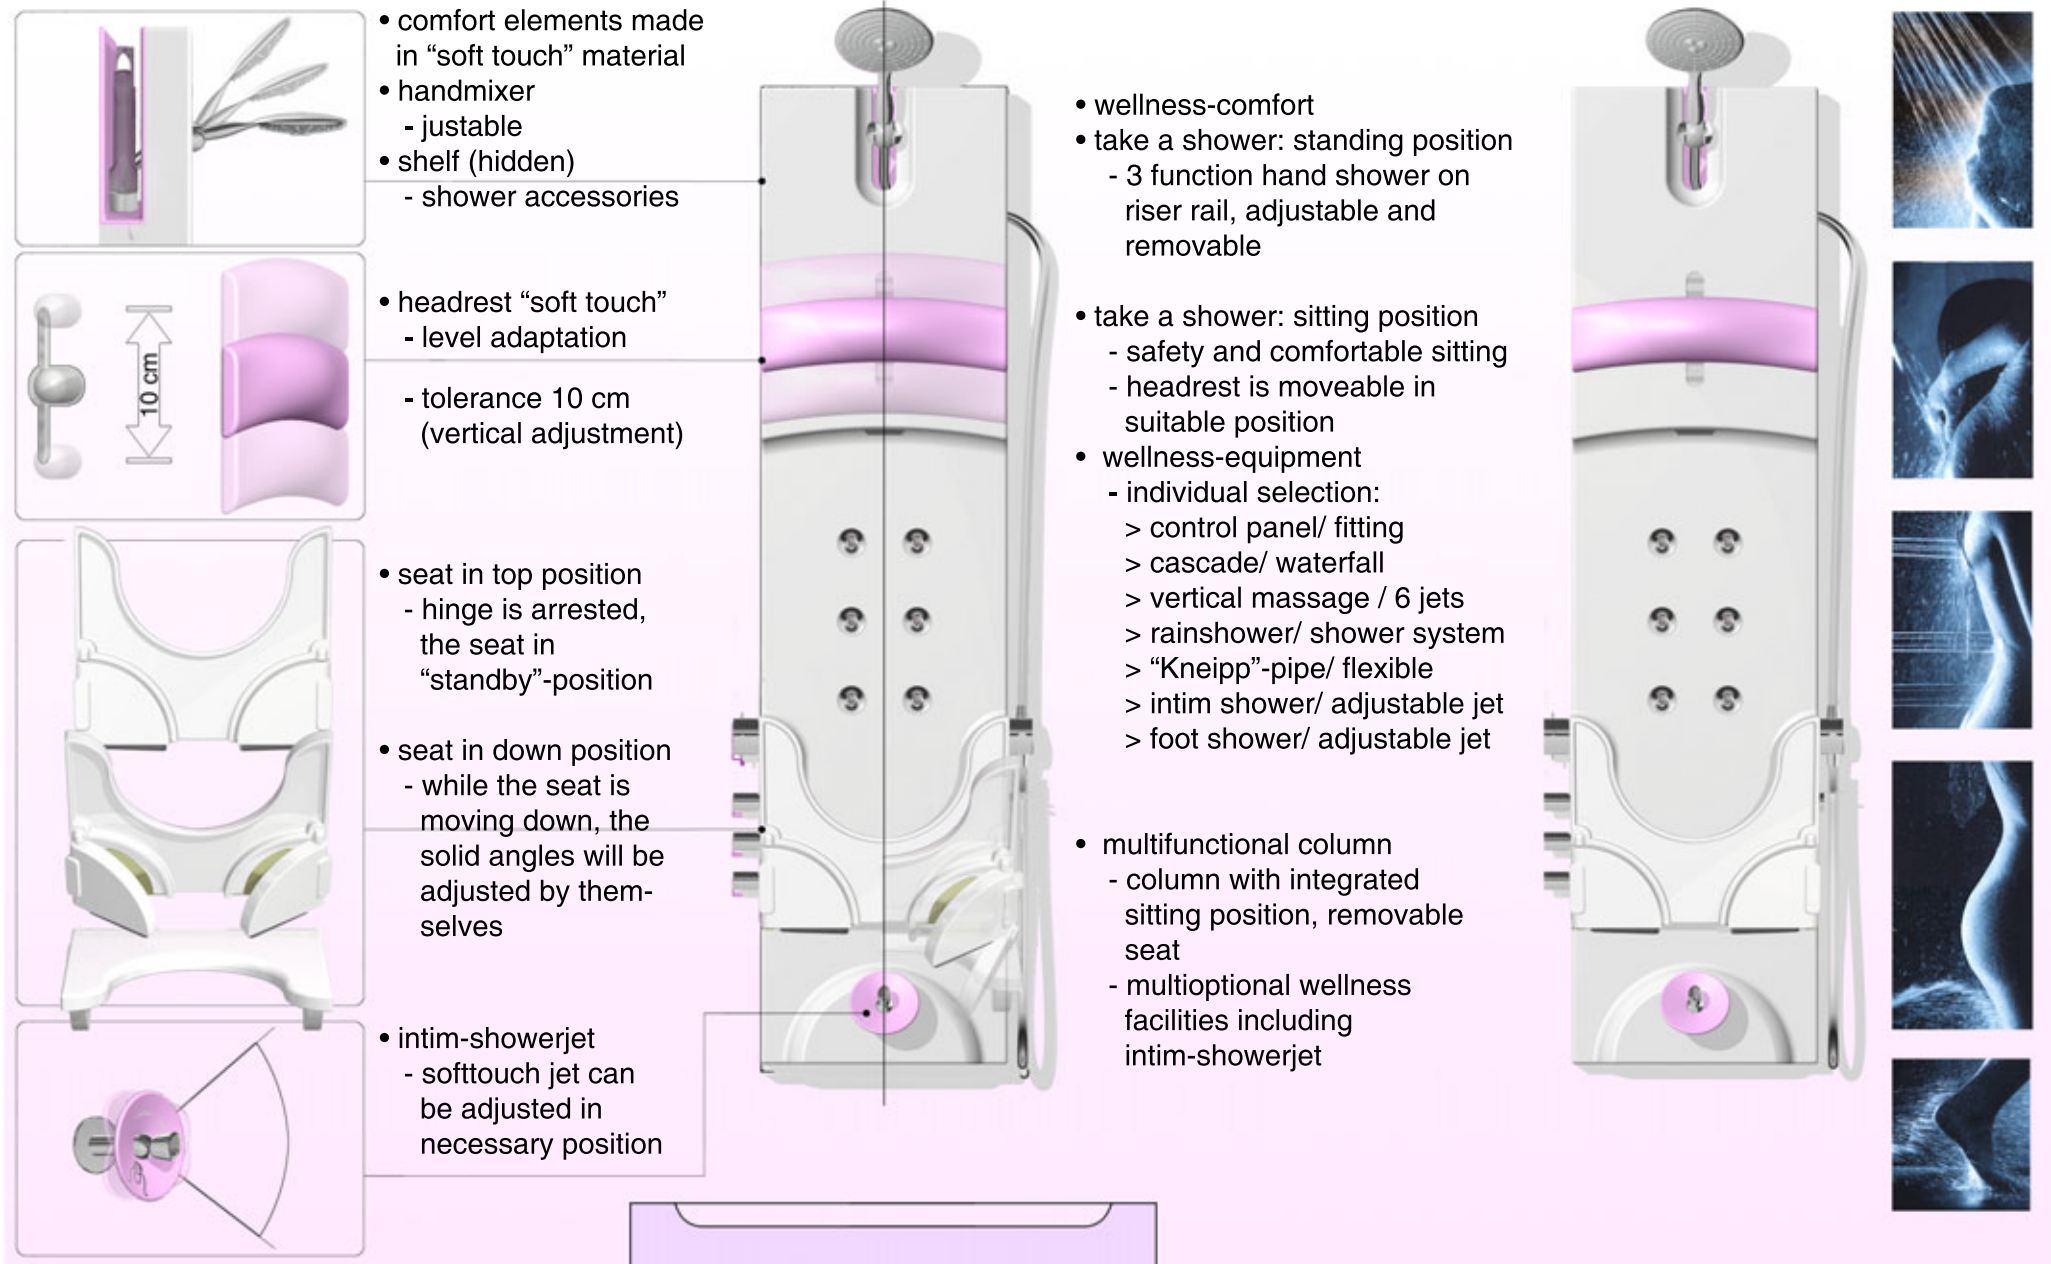

• measures: h 150, w 37.5, d 10

innovation in comfort

design conception

multifunctional column XL

innovation in fixing & mounting

• due to renovation the multifunctional column is easy to handle without difficulties in fixing and mounting:

- dismantling of existing fittings
- fixing supported by fischer Injection mortar FIS V for professional expansion-free anchoring-system
- pre-fabricated column will be wall-mounted in less steps

- **fischer Injection mortar FIS V** for professional expansion-free anchoring-system
  - the fischer Injection system FIS contains a styrene free, quick-setting, high quality hybrid resin mortar, which is characterised by its universal suitability for many applications. It achieves maximum strength values in almost all building-materials and anchors safely and without expansion pressure.

product range

- multifunctional column XL

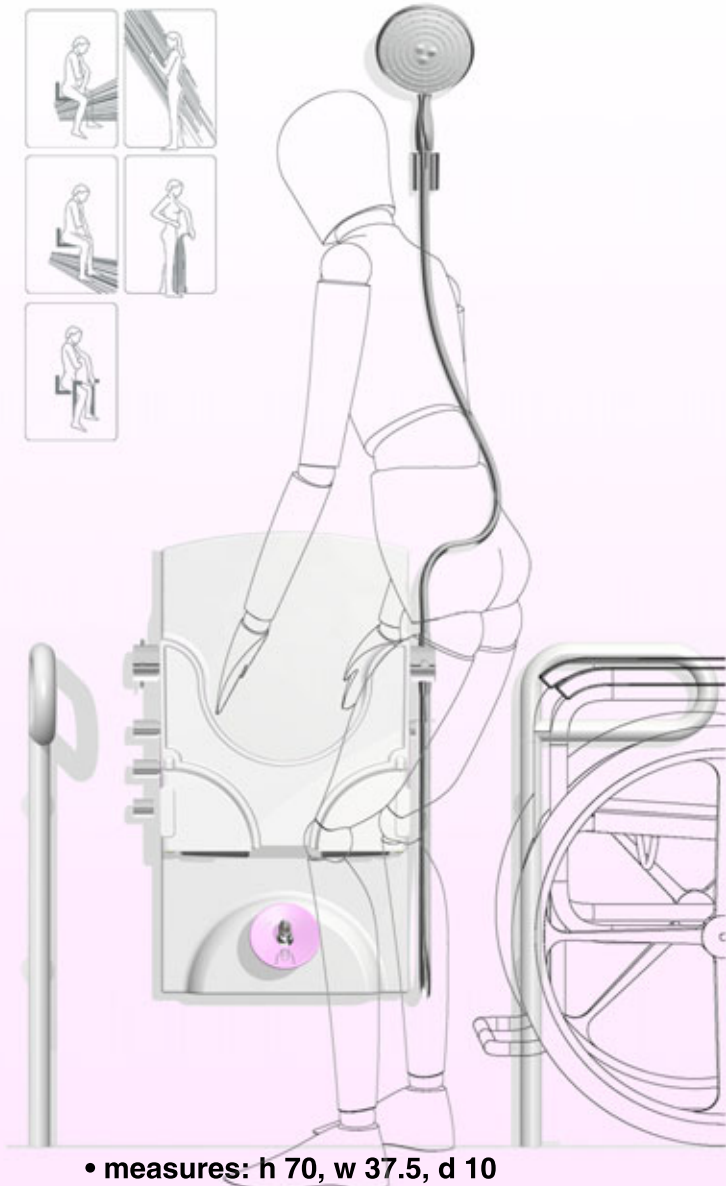

• measures: h 150, w 37.5, d 10

- multifunctional column XS

• measures: h 100, w 37.5, d 10

- multifunctional column XXS\_plus, suitable for handicapped person

• measures: h 70, w 37.5, d 10
