

I am Living Matter, intelligent expression of my planet living in continual cyclic transformation, infinitesimal part of the Cosmo.

All that surrounds me is alive and in transformation, all that I touch see and think pulses with Eternal Life where nothing is static or final, where there is neither beginning nor end.

I am the zero, or the continual cyclic moment, where the geometric flow from the past converges in me and is projected from me in a geometrical manner into the future.

But only in the elimination of the scum and the errors of the past lies my Rescue.

So I have uprooted en masse the thoughts planted in my brain by the desert people thirsting for absolute power and I have annulled them by means of intuition and reasoning.

AND SO I HAVE DISCOVERED THE ECOLOGICAL HARMONY OF WHICH I AM PART.

My eyes have opened and I have seen the horror of my present, the rotten fruits of the blind ignorance in which I had been thrown for more than a thousand years.

I have been the blind destroyer of my environment without realizing that in so doing I was destroying myself.

Instead of reasoning I have used my time to ingratiate myself with an inexistend God to the enrichment of his creators and propagators.

Every time I destroy a plant it is as if I strangled a brother with my own hands, because I live only if the plant lives!

Every time that I pollute the air I poison myself and I am guilty of the most horrible of crimes because I am committing on a cosmic scale what the desert men did to me.

Like those who have committed and continue to commit the crime of suppressing Reason, I commit the crime of Suppressing the Living Nature!

As I rebel and repudiate those who have degraded me, the Living Nature of my planet will repudiate and annihilate the monstrous creature which has defaced it.

Every time that I pollute the water I poison myself and the Living Matter.

In slaughtering the birds, part of my Living Matter, I deny myself and my intelligence, and the Living and Intelligent Matter of my planet will submerge my crops with insects and will desire the end of my cycle.

In slaughtering the animals, part of my Living Matter, the plants and the trees will lose their nourishment and in ceasing to exist even partially will prevent the monster from breathing and existing.

Now I know these things and I realize that I have been the monster, but I am still in time for my rescue.

I will restore the ecological balance in the Living Matter of my planet, because I am the intelligent part of it.

I will no longer permit any human society or individual to pollute or destroy the Living Matter as I shall no longer permit anyone to pollute or destroy the minds of me or my progeny.

I who am the son of ignorance, slave of concepts which are not my own, servant of the will of others, prey to fear, denier of Reason, worshipper of Gods created by manipulators of the conscience, I am a suicide, denier of the Living Matter.

So living, I spread destruction and in annihilating the Living Matter I destroy myself and my species...

But I who know these things will no longer be the victim of those who were the cause of my degradation and I will not be delayed in my impetus towards my own and others' Rescue because the future which I create in the harmony of the Living Matter is bright and wonderful.

Today I have glimpsed the infinite space within myself, as I have glimpsed the infinite space which surrounds me.

Today, as the astronauts begin the exploration of my outer space, I begin the exploration of my inner space, because my Reason has infinite thirst of knowledge.

For too long I have wandered almost blindly in the desert of myself and for too long I have quenched my thirst at putrid pools, BUT TODAY I HAVE DISCOVERED THE CRYSTAL CLEAR WATERS WHICH WILL QUENCH MY THIRST.
