Welcome to Our School Allotment

Our school allotment: a first look at the space available for students to grow and explore. In june 2026. A shed was built with a lot more work to follow.

September 2026

By September we had a seating area and even a small wildlife pond, with a completed shed and a green house, the students and staff worked hard to lay the weed membrane to cover the area.

November 2026, Plant beds have been built and getting ready for planting. Still a lot of work to do.
