Dear Damon,

Thank you for undertaking the Engineering and Civil Engineering Design work for our project in Maidenhead.

I am pleased to say that the project is now nearing completion and whilst it has been a challenge, we could not have completed the project successfully without your expert help and advice. Again you have gone out of your way to make sure the project was a success. It is exactly this type of service that makes you stand out from your peers and as such I have no hesitation in recommending you to my peers within the industry.

Please feel free to use this letter as such. I would welcome any calls for a point of reference.

**Jeremy Alden**  
Technical Director
