

About Us

Who are we

Tanya Eldridge

CSRT Damp & Maintenance Surveyor, Trainer & Product developer

Tanya Eldridge is passionate about reducing mould in peoples homes. She realised very soon after qualifying as a damp surveyor, that unless you have the right tools, it is nearly impossible to get the right actions in the right places daily to control mould. After searching in vein for a Hygrometer (it took her two years to spell it!), and feeling there was something else needed to help people suffering from condensation and mould, she came up with the design for Mould Less[®]. She holds a HNC in Construction, and is a Certificated Surveyor in Remedial Treatments (CSRT) through the Property Care Association (PCA) which means she is a qualified damp surveyor. She also holds level 3 qualifications through the Chartered Institute of Housing(CIH), and The Chartered Institute Of Construction (CIOB). She is also the designer of the Mould Tutor[®] Approach.

Supported by

Charlie

We pride ourselves that our gender, backgrounds, or family lives makes us unusual, perhaps ground breaking, because we are in the minority in the construction and damp industries. It is really important to us that the design and function of Mould Less[®] relates to the situations and people who will use them. In our team are lone parents who stories mirror many of the challenges faced by our valued customers. We all have a great deal of empathy and experience with many of the problems experienced when mould takes hold.

We are an enabling employer, embracing giving opportunities to those who felt unemployable due to a range of circumstances including personal learning challenges, from career gaps due to mental health, or to care for children and families.

We also have varied backgrounds and career paths that has meant that we draw experiences from family care, social housing, and being caring carers.

As far as possible we support each other to lead by example, some applying their Christian values, and all of us valuing others and the world around us.

All of the team have experienced or witnessed mould and are keen that people should not have to suffer as long as we did before it is controlled. We are keen to share as much of our knowledge as possible so your home can become speedily Mould-Less.
