

Niederberger flat grinding machine RPS

8-station surface grinding machine for processing flat, square and sectional steels.
Equipped for wet sanding K80-K1200 via paper belt filter.

Year of manufacture: 2001

Grinding range: Length: max. 6.000 mm
min. 2.000 mm

Passage height: 250 mm

max. weight per meter: 50 kg

Grinding band dimension: 2.500 x 250 mm

Height adjustment: electrically

Grinding band tension: manually

Transport speed: adjustable

Special equipment: Driven infeed roller conveyor
Driven outfeed roller conveyor
Driven return roller conveyor
Cross transport in the infeed area

State: not functional, frequency converter defective, repair costs
approx. 8 - 10 T€, normal signs of use
