

Löser surface grinding machine type FS 384/150

4-station surface grinding machine for processing flat, square and profiled steels.
Equipped for wet sanding K80-K1200 via paper belt filter.

Year of manufacture: 1999

Grinding range: Length: max. 6.000 mm
min. 2.000 mm

Passage height: 150 mm

max. weight per meter: 30 kg

Grinding band dimension: 2.500 x 150 mm

Grinding band motor: 4x 7,5 kW

Height adjustment: electrically

Grinding band tension: manually

Transport speed: 1-11m/min.

Special equipment: Driven infeed roller conveyor
Driven outfeed roller conveyor
Driven return roller conveyor
Additional hold-down rollers
Pneumatic weight compensation and belt tensioning

State: fully functional, normal signs of use
