## Standard Features

**Pump** - Horizontal triplex positive displacement pump rated up to 60HP service. Plunger pump consists of Stainless Steel Fluid Head. Stainless steel valves, seats, springs and stainless steel plungers with ceramic coating. The plungers and packing are water lubricated. The power end of the pump is positive splash oil lubricated with sight glass for oil level check. Crankshaft is gas nitralated, hardened and tempered alloy steel. Main bearings are roller.

**Water Tanks** - Twin water tanks from 360 litre to 1000 litre capacity.

**Suction Plumbing** - 1” Female BSP inlet port. Twin easy clean water filters ensures a clean water supply to the pump.

**Discharge Plumbing** - Discharge manifold with ½” FBSP outlet port. Glycerine filled pressure gauge and safety rupture disc.

**Unit Mounting** - Mounted on a steel channel frame with pump base and adjustable motor base. Steel plate top deck.

**Engine** - Lombardi or Perkins Water Cooled Engines

**Power Transmission** - Pump and engine connected via non-slip belt drive and safety guard.

**Finish System** - Units are shot blasted and then powder coated in highway yellow colour.
