

Save money saving the planet

Our little nursery is trying to be as environmentally friendly as possible! It's all small steps as we have a long way to go, but listening to the news of late, we need to make immediate changes wherever we can. We have our recycling, food and general waste bins, and consciously talk to the children about what goes in which bin.

Not wasting food, clearing up after ourselves when we are out and about and recycling everything that can be recycled are the most important steps we can take, and this is what we have been encouraging the children to do!

We've tried to keep the information simple for the children, but they are the next generation and therefore need to be informed!

As part of our small changes we are looking at our food storage and lunch boxes – we have supplied a few paper bags for you to use for sandwiches and snacks. One really important and relatively easy change is to stop the use of plastic, whether that be cling film or sandwich bags, and paper bags are a great alternative (and cheaper!)

Thank you!
