## CARACTERÍSTICAS TÉCNICAS

- La intensidad, adherencia, durabilidad y dureza de nuestros colores en resina, está garantizada.
- Hay que tener en cuenta que los colores con crazy amarillean un poco.
- En superficies grandes, sobre todo en vidrios lisos, los colores pueden sufrir pequeños problemas de homogeneidad, así como pequeñas imperfecciones. Esto contribuye a enriquecer lo artesanal de esta nueva técnica. No obstante recomendamos para este tipo de superficies, utilizar colores con crazy.
- En todos nuestros modelos se pueden cambiar los colores o el tipo del vidrio, a gusto del cliente.
- Para la limpieza de nuestros vidrios aconsejamos utilizar agua jabonosa o productos de limpieza cotidianos para el vidrio, y nunca utilizar productos abrasivos.
